

Computer, Agricultural, and Home Economics Training Gives Vocational Skills to BCA Students

In Zambia, primary and secondary schools remain closed due to Covid-19, but examination grades were allowed to return in June. For BCA, this means the 7th and 9th grade classes were able to continue with their vocational training in computers, agriculture, and home economics, in addition to other academic and biblical training. *These important skills prepare our students for future vocations...*

9th grade student, Ruth Mbulo has the best vegetable bed at school.

Students harvest corn that is used to help feed the BCA students.

In Home Economics class, students are given instructions in cooking and baking items like pies, cakes, samosas, and other foods.

More dry foods and school work were delivered to BCA students in their villages as schools remain closed in Zambia due to Covid-19.
